FUJIFILM

Metrix 3.6 Customer Training Syllabus

The outline of this Training Syllabus is based upon the Metrix v3.6 documentation, which may be obtained from Lithotechnics' website: **http://lithotechnics.com.** All training items covered in this syllabus are to be signed by both the Trainee and FTSS Technician. Those items marked **N/A** are identified by the customer as not relevant to their workflow or represent Metrix options that are not licensed.

Task Trained	Trainee Initials	FTSS Tech. Initials
1. Customer Expectations Review		
2. Overview of Metrix Documentation		

☐ **Metrix Installation Guide.pdf** *
- System Configuration / Software Installation
- Dongle and Licensing
- Client Setups (Server Version Only)
- Start/Stop Server / Client Applications

☐ **Metrix Setup Guide.pdf** (Database)*
- Presses, Binding Machines, Finished Sizes
- Paper Stocks, Inks, Paper Colors
- Customers, Product IDs/Groups
- Folding Library
- Importing File Marks, Conventions
- Workflows (Rampage)
- Editing/Saving/Backing Up Database

*NOTE: Configuration, Installation and Database Setup are covered in the **Installation_Checklist.pdf**.

☐ **Metrix Learning Guide.pdf / Metrix User Guide.pdf**
- Preferences / User Interface
- Flat & Folded Work / Bound Work
- Auto Layout / Auto Plan
- Marks / Dimensions / Standards / Reports
- Imports / Exports
- Workflows (Rampage)
- CSV Specification and Usage

☐ **Metrix Administration Guide.pdf**
- Database Maintenance & Restoration
- Installing Clients / Managing Marks
- Server Management / Locked Jobs

☐ **Metrix_3.6_Release_Notes.pdf**

☐ **Whats_New_in_Metrix_3.6.pdf**

3. OVERVIEW: Metrix Preferences & User Interface (Refer to Metrix User Guide)		

☐ **Preference Settings**
- Auto & Target Layouts / Time Outs
- Alignments / Placement Groups
- Tolerances / Workflows / T|F Toggles
- Layout and Page Views
- Project Imports / Hot Folders
- Shingling (Creep)
- Preps Marks Templates

☐ **Graphical User Interface**
- Metrix Editions Table
- Project Explorer / Properties Editor
- View Area: Object List / Layout / Assembly View
- Status Area: Rules Conformance
- Metrix Toolbar / Contextual Shortcuts
- Project / Product / Layout Properties
- Creating / Sorting / Searching / Deleting Projects

4. Flat and Folded Work (Refer to Metrix Learning and User Guides)		

☐ **Product & Page Properties**
- Name / Description / Notes / Due Date / Customer
- Selecting Type (Flat or Folded) / 1- 2-Sided
- Spine Edge: Left/Top (Folded only)
- Quantities / Finished Size / Stock Grain Direction
- Number of Pages / Fold Selection
- Default Page Properties/ Folios / Bleeds (Pos. / Neg.)
- Layout: Print Method / Press / Sheet size

☐ **Editing Properties**
- Assigning PDF Content Files / Positioning Rule
- Priorities / Groups / Display Colors / Folios
- Creating Spreads (Combine Pages) / Rotation / Offcuts
- Page (Fold/Panel) Roll-Fold Clearances

☐ **Managing Products**
- Cloning / Deleting / Deactivating
- Assigning to Layout / Reordering
- Placement Groups / Auto Layout

☐ **Layout Properties**
- Printing Method: (1-Side, SW, Turn, Tumble, Perfect)
- Changing Press / Sheet Size / Stock & Grain Direction
- Selecting Product Instances / Set Required Sheets
- Auto Layout / Page to Bleed Gap / No Image-Page
- Component Instances / Step & Repeat / Positioning
- Drag-n-Drop Auto-Bleeds / Nudging / Butt To
- Coordinate Properties and Alignment of Products
- Sheet Usage & Count
- Simple Perpendicular Nesting / Showing Thumbnails

Task Trained	Trainee Initials	FTSS Tech. Initials

5. Bound Work (Refer to Metrix Learning and User Guides)

☐ **Product & Page Properties**
- Assembly View of Bound Products
- Hierarchical Structure of Bound Nodes / Components
- Name / Description / Notes / Due Date / Customer
- Selecting Bound Type / Cover Handling
- Spine Edge: Side/Top
- Quantities / Finished Size
- Binding Machine (Saddle-Stitch / Perfect Bound)
- Number Up / Orientation / Jog
- Stock Grain Direction (Cover & Text)
- Jog & Spine Trimming / Auto Calculate Spine Width
- Cover Fold Selection / Largest Text Component
- Default Page Properties/ Folios / Bleeds (Pos. / Neg.)
- Continuing Wizard to Create Layout
- Print Method / Press / Sheet size (Cover & Text)

☐ **Editing Properties**
- N-Up Content Orientation
- Activating / Deactivating Components
- Priorities / Groups / Display Colors / Folios
- Requested Out (Auto Calculate or Fixed)
- Jog, Face & Spine Trims / Laps (Cover & Text)
- Node vs. Component Editing (Cover & Text)
- Bound Page Properties (Selecting / Editing)
- Component Symbols (Low-Pg / Jog Edge / Spine Edge)
- Assigning PDF Content Files / Position Rule
- Creating Spreads / Combine Pages (Cover Only)
- Assembly View Product Component Editing
- Assigning Components to Layouts
- Shingling (Creep): Automatic / Custom
- Collation Marks
- Binding Parameters (Stacks, Stitches, Side Scores)
- Cover Spine Widths
- Coverless Perfect Bound Products

☐ **Layout Properties**
- Printing Method: (SW, Turn, Tumble, Perfect)
- Changing Press / Sheet Size / Stock & Grain Direction
- Selecting Product Instances / Set Required Sheets
- Auto Layout / Page to Bleed Gap / No Image-Page
- Sheet Usage & Count
- Component Instances / Step & Repeat / Positioning
- Drag-n-Drop Auto-Bleeds / Nudging / Butt To
- Coordinate Properties and Alignment of Products
- Calculating Trim Margins to Fit Trimmers
- Flipping Component Instances
- N-up Products: Define Stitcher Trimmer (2-up / 3up)
- Populating N-up Products with PDF Content

6. Auto Plan Layout Engine (Refer to Metrix User Guide)

☐ **Defining Auto Plan**
- Auto Calculation of Products and Layouts
- Across One or Two Presses / Sheet Sizes
- Optimal Production Cost & Time

☐ **Database Definitions**
- Cost & Time Entries: Press & Stock
- Makeready Times
- Ink Colors of Product Pages

☐ **Using Auto Layout**
- Define All Products / Assign Paper Stocks
- Define Press(s) and Sheet Size(s)
- Define Page to Bleed Gaps
- Start Test Threshold & Time Outs for Calculations
- Applying Standards
- Stop (Complete) Calculations / Select from Ranked List
- Auto Plan any remaining Paper Stocks

7. Marks (Refer to Metrix Learning and User Guides)

☐ **Working with Marks**
- Overview: Positioning / Stepping / Sets / Standards
- Creating & Adding PDF File Marks
- Anchors: Mark / Plate, Sheet, Trim
- H/V Offsets / Front-Back / Mirroring
- Over Page Content / Assign to Export or Report
- Rectangle / Line Marks
- Text Marks: <Variables>
- Assigning Ink Colors to Marks (incl. Spots)

☐ **Marks Sets**
- Using correct Anchors for re-use on Multiple Layouts
- Saving & Applying Mark Sets
- Revising Mark Sets = Name Set EXACTLY the SAME
- Delete Mark Sets
- Deleting ALL Marks and Re-applying
- Change Spot Color for Marks

Task Trained	Trainee Initials	FTSS Tech. Initials

8. Dimensions, Standards & Reports (Refer to Metrix Learning and User Guides)

☐ **Dimensions**
- Turning on Dimensions & Annotating
- Edibility Prohibited in Dimensions Mode
- Hover, Highlight and Drag Dimensions
- Move and Delete Dimensions

☐ **Standards**
- Save As Standard
- Match Attributes: Product Size & Type / Fold / Binding Machine / Jog & Spine Trims / Press / Printing Method/ Press Sheet Size
- Applying Standards; Automatically & Manually
- Standards Set Applies: Product Instance on Layout / Marks / Dimensions / All Trims
- Auto Apply: Preference/Import Project/ Substitute Standard
- Manual Apply: Layout/Apply Standard (or Button)
- Only **ONE** Standard / Resave if Update
- Deletion possible only when Standard Visible/Selected

☐ **Reports**
- Preview & Printing
- Select Data to Include in Report
- Print to Any PDF Printer

9. Imports & Exports (Refer to Metrix Learning and User Guides)

☐ **Imports**
- Hotfolder Setup - User Preferences
- Prerequisites & Importing JDF/Metrix XML
- Importing CSV Products
  See Appendix C: CSV Specification in the **Metrix User Guide.pdf**)

☐ **Exports**
- Selecting Nodes to Export (Multiple Allowed)
- Metrix XML: Products / Projects from Metrix
- JDF Imposition: Setting Paths, Content & Attributes
- Complete JDF: Imposition back into Original JDF
- Imposed PDF: Setting Path / Attributes
- Barcode Imposed PDF: Efficient Sorting of Products / Barcode: <Variables>
- CIP3/JDF Cutting: Finishing Data for Equipment
- CIP3/JDF Folding: Finishing Data for Equipment
- JDF Binding Data (Bound Projects only)

10. Rampage Workflow (Refer to Metrix User Guide and Rampage Documentation)

☐ **Metrix-Rampage Integration Documents:**
- **Using Metrix with Rampage.pdf**
- **JDF Changes.pdf** (Technical Note)
- Set up Raster or JDF Workflow

☐ **Setting Up Metrix for Rampage**
- Preferences: Select Rampage Workflow / Restart
- Add Rampage Page and Sheet workflows to Database

☐ **Using Rampage Workflow in Metrix**
- Assigning Sheet Side Workflow to Layouts
- Assigning Page Workflows: Bound Products
- Assigning Page Workflows: Flat & Folded Products
- Assigning Workflows to ALL Layouts or ALL Pages

☐ **Using Rampage Color Aliases**
- Ink names in database: rsi_coloralias_#
- Same ink names in PDF Colorbar Marks File

11. Administration (Refer to Metrix Administration Guide)

☐ **Database Maintenance**
- Regular Shutdowns / Startups
- Database Backup Procedure
- Considerations for Standalone vs. Server
- Monitor growth (size) of Database

☐ **Restoring Metrix Database**
- Copy/Overwrite Backup Data Folder to Same Location

☐ **Multi-User Environments**
- Project Import Shared Folder Accessible to ALL Users
- Hot Folder Accessible to ALL Users
- Substitute Standards = True ALL Users (if using)
- Copy of Marks Folder and License file on ALL Clients

☐ **Unlocking and Locked Project**

Task Trained	Trainee Initials	FTSS Tech. Initials
12. Shutdown/Startup & Upgrades (Refer to Metrix Installtion Guide)		

☐ **Shutdown / Startup Procecedures**
- See Metrix Installation Guide for Installation type:
  Standalone (Single Dongle)
  License Server (Sinle Dongle)
  Shared Database (Multiple Dongles)
- Shutdown/Startup procedures are different depending on the Installation Type.

☐ **Upgrades**
- Takes Screenshots of Export Settings / Preferences
- Shutdown Metrix Services & Backup Database
- Rename Metrix Folder
- Perform Upgrade*
- Overwrite: Marks and Data folders / *.mpw and *.mdl / metrix.licenseServerKey (from previous version)
- Launch Metrix (Based on Installation Type)
- Accept Database Update

*__NOTE__: Please see the Metrix Installation Guide.pdf for the different upgrade options: Full Installs / License Updates / Changing Instllation Types.

Metrix Support - Call Lithotechnics at: (623) 594-1408

Metrix Phone support is provided by Lithotechnics under its Annual Service Agreement (ASA). Any on-site or Webex support provided by Fujifilm Graphic Systems Technical Service & Support (FTSS) is a chargeable activity. Please ask about payment options when placing a request for FTSS Webex or on-site support.
