Xerox Engine System Administrator Training Syllabus and Checklist

Tasks for which the Operator should be trained and other topics to be reviewed	Trainee Initials	FTSS Initials
Interview to determine training goals, current capabilities, and color management needs		dw
Confirm Internet Access *(For an X800/1000 the Xerox installation should have these tasks completed)*		
Train System Administrator to Load and setup the Fiery Print Drivers, Utilities, and use Administrative Tools *(For an X800/1000 the Xerox installation should have these tasks completed)*		

Module Objective – Install Fiery user software – Configure Fiery Web Tools – Understand the use of Fiery Downloader and ColorWise Pro

- Installing Windows
- Installing User Software
- Fonts
- Installing CWS for Windows/Apple PC
- Web Tools
- Align Trays
- Mixed Media
- Insert Tabs
- Soft Proofing
- Image Viewer
- Troubleshooting
- Scan
- Hot Folders
- Backup & Restore

Train System Administrator to Perform Fiery System Updates		
Review w/ the System Administrator the IOT Customer Expectation Document Review (Ref – IOT CED – www.xdss.com for most current version)		
Review w/ the System Administrator the IOT Recommended Media List (Ref – IOT RML – www.xdss.com for most current version)		

- Review customer's inventory of digital print media approved for xerographic printing
- Review GSM versus paper weight
- Storage and Handling of paper and other media (reference X700 User Guide)

Review w/ the System Administrator the IOT Safety Guide and Notices (Ref – IOT Safety Guide/Safety Notices – www.xdss.com for most current version)		
Demonstrate and Test w/ the System Administrator the IOT Quick Start Guide (Ref – IOT Quick Start Guide – www.xdss.com for most current version)		

- Media transport Path
- Control Panel
- Where to find Help
- Simple Copying
- Booklet Creation
- Simple Network Scanning
- Using Separator Pages
- Reports
- Billing Meters
- System Administrator Menu Overview
- Loading Paper and Media
- Replacing the Toner Cartridges

Demonstrate and Test w/ the System Administrator the IOT Engine Overview (Ref – IOT User Guide /User Guide Addendum– www.xdss.com for most current version)		

- Turning on the engine
- Machine Serial Number
- Engaging Xerox for machine service (1-800-821-2797
- Customer Replaceable Units
- How to order supplies and CRU's at 1-800-822-2200
- Paper
  - Paper Trays
  - Loading Media
  - Loading Tabs
- Copy
- Scanning
- Machine/Job Status
- Maintenance
- Problem Solving
- Finishing Option

Demonstrate and Test w/ the System Administrator the IOT System Administration Guide (Ref – IOT System Administration Guide – www.xdss.com for most current version)		

- System Settings
  - Accessing the System Administrator Menu
  - Common Service Setting
  - Copy Service Settings
  - Scan Service Settings
- Setup and Calibration
  - Setup
  - Calibration
- Authentication and Accounting
  - Accounting
  - Authentication/Security Settings
  - Allow User to Disable Settings
  - Job Status
  - Overwrite Hard Drive

Task Trained	Trainee Initials	FTSS Initials

FUJIFILM

Digital Front End (DFE) Customer Training Syllabus and Checklist

Work Order Number

Task for which the Operator should be trained and other topics to be reviewed	Trainee Initials	FTSS Initials
Review w/ the Operator the DFE Customer Expectation Document		

The following topics will be tailored to meet the objectives for which the engine was purchased and the experience of the operator. Topics not specifically discussed will be referenced to the various Xerox DFE and IOT User manuals for detailed explanation. A follow-up WEBEX session is available upon request for topics covered but in need of review or topics not covered during the initial training session.

Review w/ the Operator the Fiery Color Server Overview

Module Objective – Identify Color Server features – Power on and off the server – Define levels of access to the CWS – Identify the windows and panels of CWS

- Hardware Features
- Color Server Features
- Fiery Bar
- Starting up and logging in
- Powering On/Off using CWS
- Command Workstation
  - Active Jobs Window
  - Jobs Window
  - Printed Jobs Panel
  - Archive Panel
  - FreeForm Panel
  - Job Log Panel
  - Activity Monitor
  - Remote Desktop

Review w/ the Operator the Fiery Print Submission

Module Objective – Print from any platform to the color server – Print PDF jobs – Submit jobs via the downloader – Print from various applications

- Software
- EFI Driver
  - Fiery Printing Tab
- Job Templates
  - Creating a job template
  - Changing a job template
- Exercises or Practical Applications
  - Print PDF from PC
  - Print PDF from Apple PC
  - Import and print a PDF from CWS

Review w/ the Operator the Fiery Managing Jobs

Module Objective – Understand job flow thru Fiery – Monitor from CWS – Import and Cancel print jobs – Archive jobs for printing – Using, Searching, and Scanning jobs – Access Fiery Web Tools

- Job Flow
- EFI Driver
- Monitoring from CWS
- Managing Job Flow
  - Using Job Management Commands
  - Changing Job Properties
  - Importing/Canceling/Archiving Jobs
  - Using the Job Log
  - Searching the Job Log
- Exercises or Practical Applications
  - Print PDF from PC
  - Print PDF from Apple PC
  - Import and print a PDF from CWS
- Scan
- Web Tools

Review w/ the Operator the Fiery Calibration and Color

Module Objective – Calibrate the color Server – Understand the features of ColorWise Pro Tools

- Calibration
  - Understanding Calibration and how it works
  - Scheduling Calibration
  - Checking Calibration status
  - Color measurement Instruments
  - Using Calibration
- ColorWise Pro Tools
  - Profile Manager
  - Downloading and Managing Profiles
  - Editing Profiles
  - ColorWise options
  - EFI Color Profiler
- Exercises or Practical Applications
  - Calibrate the Fiery Color Server
  - Demonstrate how to create a CMYK Device Profile
  - Observe Operator create a CMYK Device Profile
  - Using the Device Profile

Review w/ the Operator Advanced Fiery Color Server Features

Module Objective – Advance features of CWS – EFI Impose and more about ColorWise Tools – Variable Data Printing – Hot Folders – Graphic Arts Premium Package capabilities – E-mail

- More Command Work Station Features
  - Printing Groups
  - Reorder Jobs
  - Schedule Printing
  - Rush Printing
- EFI Impose
- Variable Data printing
  - FreeForm
    - How FreeForm Works
    - Create Master Document
    - Create Variable Document
    - Printing Variable Data Documents
- Imposing Variable Data Jobs
- Hot Folders
- Graphic Arts Package
  - Paper Simulation Spot-On
  - Substitute Colors
  - Soft Proofing
  - Progressives
  - ImageViewer
  - Converter
  - Hot Folder Filters
  - Half Tone Screening
  - Postflight
  - Multiple Plate Separations
  - Paper Simulation
  - Auto Trapping
- Fiery E-mail Service

Review w/ the Operator System Administration features

Module Objective – Understand where to go to learn more regarding System Administration

Task Trained	Trainee Initials	FTSS Initials

Technical Support - call 1-800-FLY-FUJI option 1		

- Explain the first request for support should always go to Xerox 1-800-821-2797
  - Xerox Welcome Center personnel will make initial attempts to resolve the issue
  - If the issue is application related, Xerox Welcome Center will escalate the problem to a 2nd level application person
  - 2nd level application support will make every attempt to resolve the problem using the most expedient methods the symptom allows
- Explain the normal steps to resolution will result in Xerox engaging FTSS for application, color reproduction or workflow
- Explain if Xerox service recommends engaging an "Analyst" that these requests should come to FTSS TRC (1-800-FLY-FUJI, option1)
- Explain that engaging the TRC for DFE/Application related issues is not chargeable
- Explain that FTSS on-site services may be chargeable, depending on the issue, and are not covered by the Xerox FSMA.
- Explain FTSS on-site chargeable services may be pre-paid by purchasing a CSA by contacting Steve Hagen at (1-630-259-7317)

Customer Acceptance the engine operates to manufacturer's specifications		

- Run the Fuji-Xerox acceptance file (found at the FTSS FTP site in the Xerox Service folder

o Verify Color o Verify Registration o Single –sided printing	o Verify Document Length o Verify document width o Duplex o	o Verify no image Skew o Verify Front-to-Back registration o 3-hole punching o Stapling
